Mr. David Simmons
U.S. Patent and Trademark Office
Washington, D. C. 20231

Re: Submittal of Revised Materials on my U. S. Patent Application # 09/289/723
(04/12/99) to Primary Patent Examiner, Mr. Peter Hruskoci, Primary Examiner Art Unit # 1724, to
U. S. Patent and Trademark Office,
Washington, D. C. 20231.

Dear Mr. Hruskoci,

I received your July 28, 2000, request today, August 3, 2000. I called your office; however I was not able to reach you. Later I phoned Mr. Simmons. He related to me that you were off this week. I am filing all information you requested and am including a electronic disk that should enhance your ease in readying, preparing for publishing, printing, etc.

In accordance with 37 CFR 1.111 I have complied. With respect to 37 CFR 1.125 (b) Substitute Specification (1) the substitute specification includes no new matter;

A marked up copy of the substitute specification showing the matter being added to and matter being deleted from specification of record. © A substitute specification has been submitted in clean form without markings and the electronic disk has been submitted (in microsoft word) with the claims as in Original Record and the new numbered claims as required in numbered new from claims 15 thru claim 24.

Thus, the numbering of claims is in accordance with 37CFR 1.126 which requires the original numbering of claims to be preserved throughout the prosecution.

Thank you for your expert assistance. I am going to be out of town in Salt Lake City, Utah, until approximately September 6, 2000, shortly after Labor Day. If I do need to present any additional info, materials prior to the October 21, 2000, { six months date from your original April 21, 2000, request }, please let my wife know by phone at (864) 515-9788 or fax at (864) 515-9788 so she can inform me and I would see about getting access to a computer in SLC, Utah, to finalize any more materials you need.

Again, thanks for your help and I do hope to proceed to get this patent accepted and published in the near future. As everyone wins in that environment is enhanced and the pulp and paper industry will save millions of dollars in electrical energy. Until our next visit, I remain

Sincerely Yours,

Launeil "Neil" Sanders
